Re: *maintenance of detection and automatic fire fighting systems, installed in buses operated by MZA Sp. z o.o.*

Miejskie Zakłady Autobusowe Sp. z o.o. with its registered office in Warsaw, certify that Systemy Autobusowe Sp. z o.o. performs technical inspections of automatic fire fighting systems - FIRETRACE and FiwaGuard.

Technical inspections are held every six months over a three-year warranty period for the systems installed in new and operated buses.

Totally, at MZA automatic fire fighting systems FIRETRACE are installed in 811 buses which means that each year over 1600 inspections of the installations are performed. FiwaGuard systems are installed in 187 buses which means that each year over 370 inspections of the installations are performed.

The activity of the maintenance technicians of Systemy Autobusowe to date justifies a statement that the automatic fire fighting systems FIRETRACE and FiwaGuard installed in MZA buses are characterised by high reliability while any other defects are remedied without delay.

The performance of appropriate technical care over the automatic fire fighting systems FIRETRACE and FiwaGuard places Systemy Autobusowe among the trusted and competent providers.
